

# Project Initialization and Planning Phase

|               |                                             |
|---------------|---------------------------------------------|
| Date          | 25 June 2026                                |
| Team ID       |                                             |
| Project Name  | Emotion Detection & Learning Support Engine |
| Maximum Marks | 3 Marks                                     |

## Define Problem Statements

| Problem Statement | I am (Customer)                                                        | I'm trying to                                                                | But                                                                                                             | Because                                                                                                                     | Which makes me feel                                                                        |
|-------------------|------------------------------------------------------------------------|------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| PS-1              | A university student engaged in online or self-paced digital learning. | Understand difficult academic concepts and complete coursework successfully. | I frequently experience confusion, frustration, stress, and lack personalized academic guidance while studying. | Traditional e-learning platforms and generic AI assistants do not recognize my emotional state or provide adaptive support. | Overwhelmed, emotionally isolated, unmotivated, and less confident in my learning journey. |
